

PowerPack Sidemount Spring Assembly

PowerPack Sidemount Spring Assembly

- Low profile design
- Fully enclosed – protects springs from the elements
- Universal design – no left or right
- Works up to 28'

PowerPack Installation

Undermount/Underbody Spring Assembly

Undermount/Underbody Spring Assembly

- Greater spring tension
- Clean design sits flush against trailer body
- Ideal for longer tarp systems
- No welding required
- All components are plated or powder coated
- Works up to 42'

Underbody Installation

Undermount Installation

Flange Mounted Spring Assembly

Flange Mounted Spring Assembly

- Underbody housing sits flush against trailer body
- Industry's strongest spring assembly
- More tension in less space
- Works up to 42'

Flange Mounted Installation

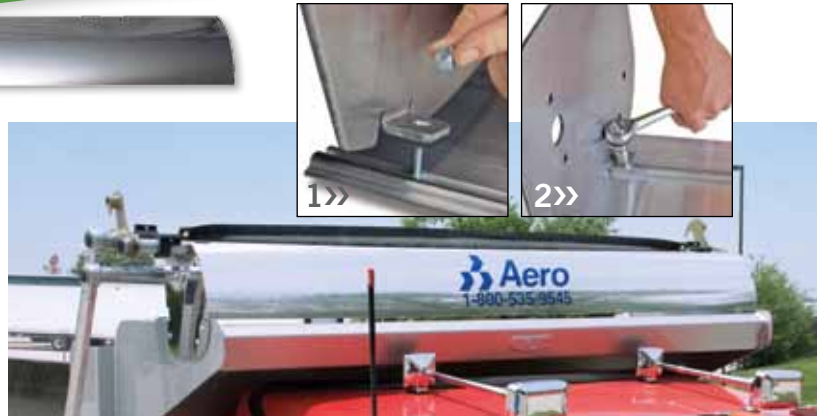

Double Helix PowerPack Spring

- Double helix PowerPack spring assemblies can be mounted higher on sides of body due to greater angular range of motion.
- Nearly 2x the tension of competitors' spring
- E-coated for long-life

Wind Deflector

- Easily adjusted to any width
- No drilling or cutting required
- Sleek aerodynamic design protects tarp
- Ideal for cab shields or trailers with square front corners

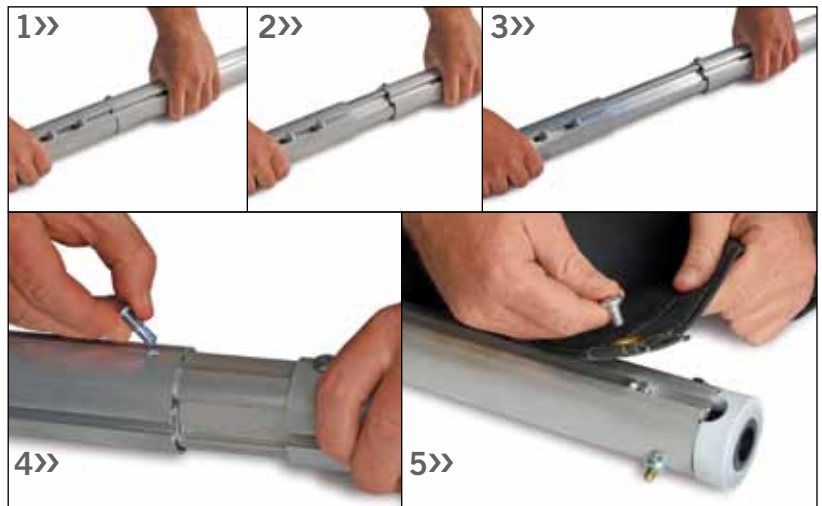

Housing

- No assembly required
- Ideal for trailers with round front corners or dump bodies with narrow cab shield widths
- Heavy duty design – fully encloses tarp roll-up tube
- Sleek aerodynamic design

Tarp Roll-Up Tube

- Telescoping design allows for adjustable width
- Tarp installation and removal is fast and easy
- No drilling required

Double Stitched Rear Pocket

- Multi-layer reinforced pocket creates a stronger tarp
- Prevents edges from tearing
