Aero Industries Receives Patent on Side Dump Tarping System
Innovation in design distinguishes SideKick™ from the competition

INDIANAPOLIS—Aero Industries, Inc. bolsters its product catalogue of tarping systems in Spring 2005 by patenting the SideKick™ – a roll tarp for side dump trailers.

SideKick™ provides the strength and durability with an ease of operation every operator needs. Powered by a sealed motor with cast gearbox, the system employs lock collars on the arm to raise the mesh tarp above a heaped load. When stowed, the aluminum roll tube rests under the side lip of the trailer to enable dumping from either side.

The lightweight tarp is made from the toughest mesh available in the industry yet the full system weighs only 225 pounds.

Aero Industries manufactures accessories for dumps, flatbeds, and other trucking and transportation applications. Product lines include automated tarp systems, dump liners, flatbed bulkheads and boxes, and the Conestoga sliding tarp system for flatbed and drop deck trailers. Aero Industries is headquartered in Indianapolis, with manufacturing centers in Ohio and Nebraska. The distribution network includes Canada and Europe. Visit them on the web at www.aeroindustries.com or call 1-800-535-9545 for more information.
