Side-to-Side *Tarp Solution*

SIDEKICK 2

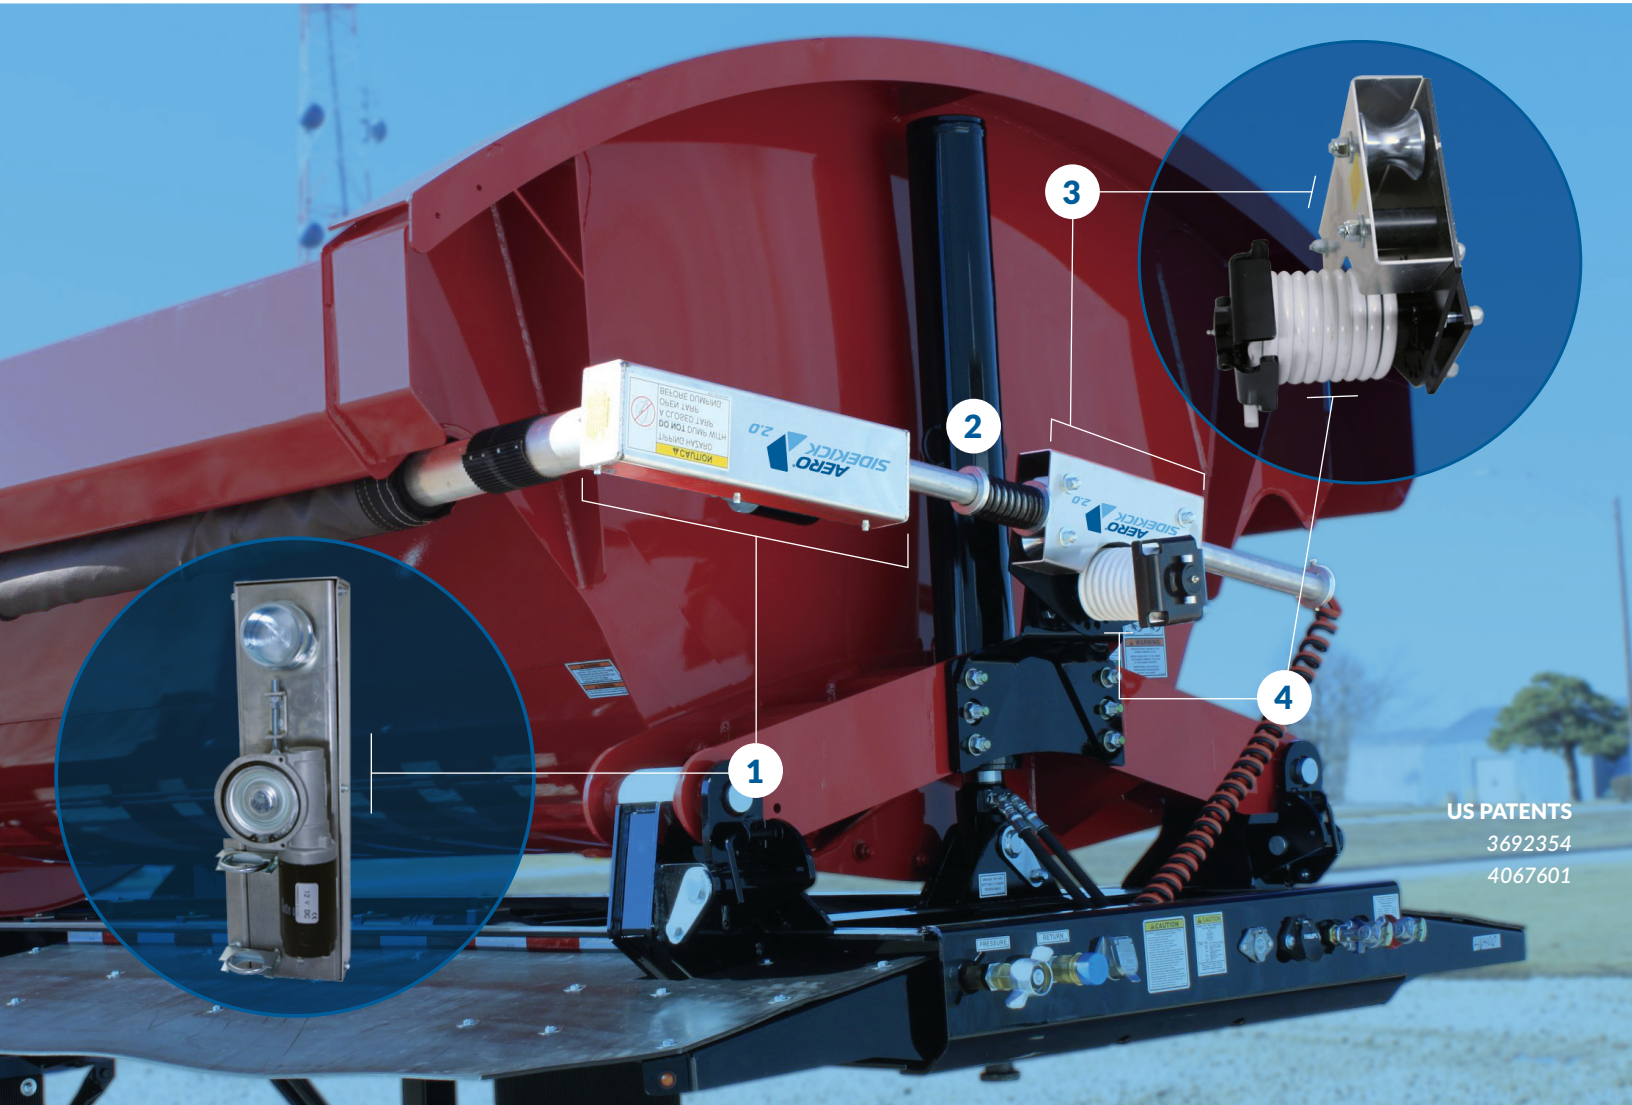

This second generation product combines the simple design of the original SideKick® system with innovative components that provide strength, less pressure, and more torque during operation. The new design provides a tighter seal against the top-side-rail providing more clearance for easier dumping.

Lightweight design

Strongest roll tube on the market

Designed for easier installation

Increased torque during operation

US PATENTS
3692354
4067601

1 DRIVE BOX

Increases roll tube torque by 60%
Eliminates pressure on motor shaft
Roll tube is supported by 2 roller bearings
Increases clearance between the tube and the chassis

2 COMPRESSION SPRING

Provides greater lift for larger loading

3 PIVOT BOX

Reduced tension on swing-arm
Features u-groove rollers extended over a larger area

4 TORSION SPRING

Robust design
Longer lifespan
Increases torque on the tarp
Smooth operation
