

FLATBED  
SOLUTION

# INDUSTRY FIRST IS STILL THE STRONGEST AND LIGHTEST

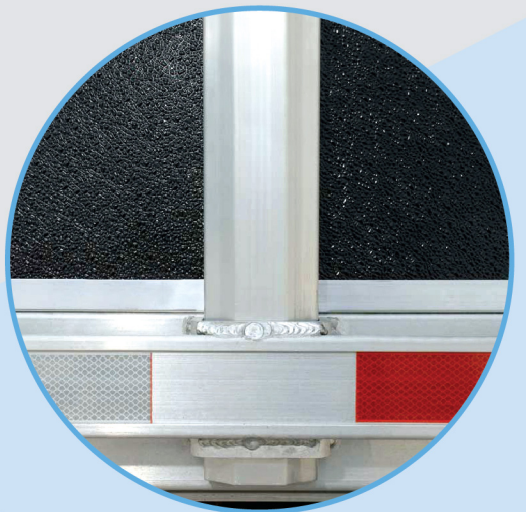

## HAUL WITHOUT LIMITS

Aero's Side Kits provide safe, weather sealed protection for your loads hauled on flatbed and drop deck trailers. Featuring the strongest stakes in the industry, each component has been expertly engineered for strength and durability. Lightweight Side Kits are easily assembled and disassembled. Due to their high strength, Aero Side Kits are in use by the United States military.

Standard 7/8" aluminum bows in rises from 10-30"  
*(optional PVC coating available)*

18oz vinyl tarp with grommets or webbing and d-rings

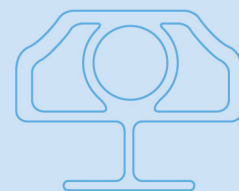

Tarp stays catch tarp when loading

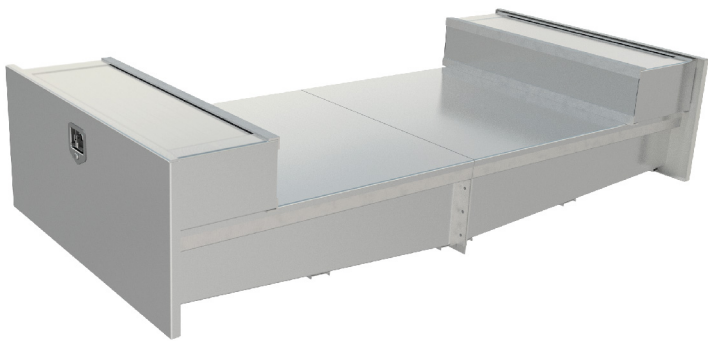

# 2 ROBUST STAKES

**JUNIOR**  
Strong and lightweight

**SQUARE**  
Maximum pocket wear surface  
only available for 3-1/2" x 1-5/8" pockets

### UNDERMOUNT STORAGE

Our optional Side Kit storage racks allow the driver to store both the panels and stakes for the Side Kit under the bed of the trailer. This organized storage system simplifies set-up and breakdown.

US PATENT 5957351

### AEROLITE™ PANELS

Field tough and lightweight fluted plastic panel surrounded with a rigid aluminum frame.

**Strong and light-weight**  
*No painting required*

### TUF-KIT PANELS

Attractive, low-maintenance fiberglass reinforced plywood panels with aluminum C-channel protectors at bottom edge.

**Ideal for rugged applications**  
**One or two sided fiberglass protection**

AeroLite panel with aluminum frame

### STRENGTH AND SAFETY WHERE YOU NEED IT

Strong, durable and good looking, Aero's Bulkheads' unique reinforced-post design provides additional strength at the back of the wrap. The corrugated front eliminates the need for posts and stake pockets across the front of the trailer—allowing for universal fit and easy installation. DOT-rated bulkheads come in 10" and 22" models. The 22" wrap model is designed with holes in the top rail for Side Kit bow storage. Aero tests DOT rated bulkheads to FMCSA 393.114 standards with their destructive tests.

*Solid post design provides additional strength throughout the bulkhead*
